Software engineer with 9+ years building web and mobile apps. I started as a hard coder, writing every line by hand, and now work with AI agents, which help me and my team deliver faster. I've taken products from idea to launch, on my own and in teams, and I pick up new languages and tools as the work needs. I enjoy sharing what works and building together.

2017 – 2021 · **3 yrs 10 mos**
Hard coder
Wrote and fixed code by hand.

2021 – 2025 · **3 yrs 8 mos**
AI-assisted
Started using AI tools to speed up routine work.

2025 – Present · **1 yr 9 mos**
Working with AI agents
Plan first, split work into small tasks, run AI agents side by side, then check with tests and a second review.

PASSION PROJECT · LIVE NOW 2026 – Present

Daily Quest: Rewards Platform

dailyquest.co · Questor: iOS / Android · Hub: iOS / Android

A rewards platform for local shops with two apps: Questor, where customers complete quests to earn rewards, and Hub, where owners run their program. Built solo, end to end, with AI agents, including paid subscriptions.

THINGS I'VE SHIPPED

Moonwatcher: Trading Alerts · Side project, paid service 2025
- Built and ran a paid Discord service that sent crypto and stock trading alerts to a crypto community, with AI analysing market conditions.

Favor Church Mobile App · Side project, volunteer 2023 – Present
- Built a mobile app (Flutter) to replace manual check-in and event sign-up, learning the tools from scratch, and now improve it with AI agents.

EXPERIENCE
